

Transcript 2 – Navigating the world of AI

NG WEI LI TENBY INTERNATIONAL SCHOOL SETIA ECOHILL, MALAYSIA

"Welcome to the world of AI, where innovation meets responsibility. As we dive into the realm of artificial intelligence, their journey isn't just about technological advancements, it's about navigating our landscape with crucial considerations, particularly in data privacy and security. In this era of AI, our priorities revolve around safeguarding individual rights and fostering trust. Ensuring informed consent becomes paramount. Empowering individuals with knowledge and choice regarding their data usage, anonymizing and minimising data, mitigate risk, preserving privacy without compromising progress. Challenges arise in balancing innovation with ethical responsibility. The evolving nature of technology often outpace regulatory frameworks. Creating a continuous quest to adapt and refine our practises, secure data storage and strong security measures are the cornerstones, these dynamic landscape demands vigilance in anticipating and addressing emerging risk, ensuring that our technology advancement align with ethical standards.

The complexity of these priorities demands at a delicate equilibrium, where technological advancements and ethical considerations harmoniously coexist. Understanding disparities and challenges serves as a guiding light."
